

“GREEN INNOVATION CONCEPTS”

Globus launches a new business unit: our expertise towards a more sustainable industrial evolution

Over the last 25 years at Globus we have always approached the design and manufacturing of our products and solutions with a clear mission to guarantee performance and efficiency.

Today’s world poses a new challenge: maintaining the same excellence while reducing the environmental impact of our product and processes.

For this reason, we are pleased to announce the launch of a new Business Unit: Globus **Green Innovation Concepts**. A creative laboratory, made of Globus best engineering resources, working to generate new ideas and to develop tailored made solutions aiming at energy saving and emissions reduction.

OUR MISSION

- Develop innovative technologies
- Provide products and services that fit to the purpose of our worldwide customers
- Be curious and creative, with the aim to continually improve
- Be practical with agile approach and lean thinking

OUR VISION

Provide solutions while taking care of ecological issues and provide eco-compatible plants.
