

## **GLOBUS SUPPLYING TOSYALI TOYO ÇELİK COIL COATING LINE WITH NEW TENSION LEVELING SECTION**

Globus S.r.l. has entered into a contract with Tosyali Toyo Çelik A.Ş. to supply a Tension Leveling Section which will be incorporated in the Coil Coating Line supplied by Globus in 2015.

This integration will improve the strip quality, thus allowing Tosyali Toyo to expand to markets with more stringent quality requirements.

Globus will supply the tension levelling section with a modular approach, designing and integrating it with a minimum impact on the CCL production. The overall line productivity will not change when the the upgrade will be in place.

The investment by Tosyali Toyo Çelik A.Ş. strengthens the business relation with Globus S.r.l. and confirms the custom-oriented approach we always been proud of.

Globus S.r.l., based in Turin, Italy, can be reached at [sales@globus-eng.com](mailto:sales@globus-eng.com).
